

ARTIFICIAL
INTELLIGENCE
IN HEALTH
SUMMIT 2026

CONCEPT NOTE

Abuja, Nigeria

19-20 October 2026

*Convened by AHFID
(Africa Hub for Innovation & Development)*

Catalyzing Country **AI-in-Health**
*Framework for Transformative
Healthcare Systems*

October 2026

Background

AI is rapidly transforming healthcare delivery worldwide; enabling more accurate diagnostics, predictive disease surveillance, personalized treatment, operational efficiency, workforce optimization, and evidence-informed policymaking. As countries accelerate digital transformation, AI has emerged as a strategic enabler for strengthening health systems and advancing Universal Health Coverage (UHC).

Nigeria has demonstrated significant commitment through its National Artificial Intelligence Strategy, investments in digital public infrastructure, and health information systems modernization; presenting a unique opportunity to position the country as a continental leader in responsible AI for health.

KEY BARRIERS TO SCALE

- Limited governance frameworks
- Inadequate data interoperability
- Shortage of AI-ready health professionals
- Infrastructure constraints
- Financing gaps
- Ethical concerns
- Limited multi-sector collaboration

Nigeria's Premier Platform for AI-Enabled Healthcare

More than a conference — a strategic policy and innovation platform convening national and international leaders to build practical pathways for responsible AI adoption across healthcare systems. The Summit will catalyze dialogue, strengthen partnerships, showcase innovations, mobilize investment, and generate actionable policy recommendations.

SUMMIT GOAL

To catalyze a coordinated national and regional ecosystem that accelerates the responsible adoption, governance, financing, and implementation of Artificial Intelligence for stronger, more resilient, equitable, and future-ready health systems.

Summit Objectives

1

Catalyze a National AI-in-Health Framework

Facilitate strategic, inclusive national roadmaps for AI adoption in healthcare.

2

Advance Universal Health Coverage through AI

Promote AI as a tool to improve access, affordability, and quality of care.

3

Share Innovations and Best Practices

Provide a platform for innovators to showcase scalable AI-driven health solutions.

4

Strengthen Policy and Ethical Guidance

Foster dialogue on ethical, policy, and regulatory frameworks for responsible AI use.

5

Facilitate Partnerships, Collaboration and Investment

Drive investment and ecosystem-building across the AI-in-health landscape.

Programme Structure

A two-day programme combining thought leadership with actionable deal-making and policy dialogue.

1 Keynote Addresses

National and continental leaders in health, technology, and AI.

2 Panel Discussions

AI in Health Policy & Regulation; AI for Resource-Limited Settings.

3 Startup Showcase

Live demonstrations of AI-driven healthtech solutions.

4 Poster & Abstract Presentations

Peer-reviewed research on AI innovations and pilots.

5 Startup Pod & Deal Room

Structured investor-startup matchmaking and collaboration.

6 Political Engagements

Public commitments from government and continental stakeholders.

7 Networking Sessions

Facilitated meetings across government, donors, industry, academia.

Target Participants

- Policymakers and government leaders (Federal Ministry of Health & Social Welfare, NITDA, NPHCDA, NCAIR, NCDC, and others)
- Local and international investors and venture capital firms
- Academia and public health researchers
- Health professionals, students, and researchers
- Nigerian and African AI health startups and innovators
- Development partners and multilateral organizations (WHO, World Bank, UN agencies)
- Private sector and technology companies
- Media, influencers, and thought leaders

Expected Outcomes

Policy Outcomes

- Draft recommendations for a National AI-in-Health Framework
- Policy recommendations for responsible AI governance
- Strategic roadmap for AI integration across health systems

Partnership Outcomes

- New public-private partnerships
- Memoranda of Understanding (MoUs)
- Multi-sector collaboration platforms
- Cross-country technical collaborations

Innovation Outcomes

- Increased visibility for African AI innovators
- Investment opportunities for health tech startups
- New research collaborations
- Pilot implementation opportunities

Capacity Outcomes

- Enhanced understanding of responsible AI among policymakers
- Increased institutional readiness for AI adoption
- Expanded technical networks across sectors

Knowledge Products

Documented outputs that carry Summit outcomes forward into national policy and practice.

Why Partner

Visibility & Positioning

Establish your organization's brand as an AI-in-health leader.

Influence

Help shape AI policy across Nigeria and the wider African continent.

Access

Connect directly with key government, investor, and innovation stakeholders.

Impact

Contribute measurably to health coverage and system efficiency.

Africa Hub for Innovation & Development (AHFID)

AHFID is convening the AI in Health Summit as part of its commitment to advancing digital transformation, innovation, evidence-based policymaking, and health systems strengthening across Africa.

Through strategic partnerships with government institutions, development partners, academia, industry, and innovators, AHFID aims to position the Summit as Africa's leading platform for shaping responsible AI adoption in healthcare — catalyzing collaborative action toward resilient, equitable, and future-ready health systems.
